

### Guidelines that I followed during my interview process:

- 1) I got up early having a good sleep. This will help you to stay fresh and positive during the whole day.
- 2) Memorized whatever I read and studied till the last night. I prefer not to read or try to learn new concepts before 2-3 hours of your interview.
- 3) I wore a well ironed interview wear with a decent looking tie which looked attractive.
- 4) Arranged myself in a bright lighted place (facing the light\*), with a plain background.

Before the interview, just before 10min I had meditation and prayer for 5min and got settled for the seat. Interviewers were very punctual. I Started with a *smile* saying good Morning with confidence.

During introduction I introduced myself with a smile on my face with enthusiasm, where the interviewer was impressed.

Then she started with technical questions and coding on screen for more than an hour.

- ***The main thing is, the first impression is the best impression that you create.***

***Communication, confidence, attitude, smile on your face, till the end of the interview matters a lot.***

- ***Read about the company:***

- 1) *What kind of qualities must an employee have as per their requirements?*
- 2) *What are various technologies they are working on?*
- 3) *Latest updates, news, feeds etc.*

- Do follow the guidelines given by the placement officer/faculties.
- Every interviewer will make you comfortable.
- Give your best like this is going to be the first and last interview in your life.
- Be very honest during your interview.
- Even if we are wrong somewhere while answering never panic, just chill down and sit calmly, they might correct you but *never start to argue*.
- If you start fumbling, make yourself calm and slow down the speed and frame the sentence properly.
- Listen completely to the questions, what the interviewer is asking about, and never rush.
- Don't over react, pretending to be smart or showing an exaggeration and act fake. *Be simple as you are.*
- If you have any good question, you are good to go only if the interviewer gives you the permission to ask.
- *It's good to end the interview by appreciating them and also wishing them a good day as they have spent their valuable time for you.*
- ***PRAY: If no one is there God is with you.***

Candidate name: Aghosh Raghuvaran  
CDAC- Kharghar 2020-2021

THANKYOU
